EL Hopper Loaders

EL Series Hopper Loaders are an economical solution to your machine-side conveying needs. All models are designed for reliable operation with minimal maintenance.

All models, except the EL1, include filter blowback to maintain the operating efficiency of the loader and extend the motor life. The "VP" models include control capability for the optional proportioning valve.

EL7 VP

Specifications

Model	Receiver Volume ft ³ (l)	Standard Capacity lbs (kg)/ hr.	Proportioning Capacity lbs (kg)/ hr.	Motor HP (kw)	Voltage	Dimensions in. (mm)	Weight lbs (kg)	Blowback	Proportioning Control
EL1 ¹	0.03 (1)	110 (50)	—	1.1 (0.85)	115/1/60	6.7 x 17 (170 x 430)	16 (7)	No	No
EL3	0.1 (3.5)	275 (125)	—	1.47 (1.1)		9.1 x 22.5 (230 x 570)	22 (10)	Yes	No
EL3 VP			220 (100)					Yes	Yes
EL7	0.25 (7.5)	325 (150)	—			8.7 x 26.8 (220 x 680)	25 (11)	Yes	No
EL7 VP			265 (120)					Yes	Yes

¹ EL1 is designed for pellets only and cannot be used for regrind.

Standard Features:

- Stainless steel vacuum receiver
- Hinged lid with latch for easy access to filter
- Material inlet:
 - EL1: 30 mm
 - EL 3 & 7: 40 mm
- Counter-weighted flapper assembly
- Integral demand switch
- Riser assembly with vented access door
- Electronic control assembly mounted on loader
- Sound enclosure
- Pick-up wand and flexible hose
- 115/1/60 supply voltage

Options:

- "VP" controller with proportioning capability
- "EPV" remote proportioning valve
- "RC" remote control (optional with VP models only.)
